

# JETWAY® PASSENGER BOARDING BRIDGES

LOW-RANGE BRIDGES FOR REGIONAL AIRCRAFT

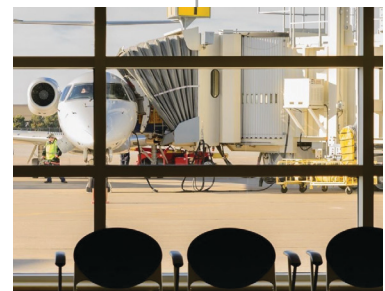

Passengers deserve the same premium large jet experience, even when traveling on smaller regional aircraft. Our low-range of passenger boarding bridges serve regional airports with standard or lower terminal floor heights. The bridge cab design is capable of negotiating doors, steps and handrails of many regional aircraft.

## Features and Benefits

- Designed for extra low-range operational capabilities
- Sensors for efficient docking to regional aircraft
- Lower height rotunda designs
- Adjustable and retractable cab floors for regional jet docking
- Modified canopy closures for weather seal around the aircraft fuselage

## Options

- Compatible with JetDock® Automated Bridge Docking for intelligent and efficient docking
- Pairs with iOPS® Intelligent Monitoring Technology to support full gate and equipment connectivity
- Consider enhancing power and traveler comfort with JetAire® Pre-Conditioned Air Units, Jetpower® 400 Hz, and 28VDC devices
