

ALL-ELECTRIC | HIGHLY RELIABLE | POWERFUL | PRECISE | AGILE

MISSION-READY MOBILITY: ADVANCING FLIGHT LINE OPERATIONS.

Oshkosh AeroTech LEKTRO® Towbarless Tractors provide an all-electric, powerful, and precise alternative to traditional towing. The all-weather design enables a single operator to move aircraft in challenging outdoor conditions, while its maneuverability and quiet, emissions-free technology also make it ideal for in-hangar movements. The range of LEKTRO® Tractors provides the ability to maximize space, streamline ground operations and ensure assets are staged, secure, and mission-ready.

LEKTRO® 86

- Standard length model tows up to 30,000 lbs (13,608 kg)
- Extended “X” model tows up to 40,000 lbs (18,144 kg)
- Extended “X” model option adds 24” chassis length for additional clearance of prop blades or long radomes

The LEKTRO® 86 tractor series provides maneuverability in a compact size and is a great choice for piston trainers to mid-size business jets.

LEKTRO® 87

- Standard length model tows up to 80,000 lbs (36,287 kg)
- Extended “X” model tows up to 85,000 lbs (38,555 kg)
- Extended “X” model option adds 32” chassis length for farther reach

The LEKTRO® 87 tractor series provides flexibility and capacity without compromising its compact design to support mid-sized VIP transport aircraft and heavy-nose helicopters. Tail-wheel helicopters and aircraft with long or low radomes like Falcons benefit from the extended model of the LEKTRO® 87 Tractor.

LEKTRO® 88i

- Tows up to 120,000 lbs (54,431 kg)
- 40% faster winch-out speed, 25% more side-pocket space, fully PLC-controlled, 80v AC drive system, and other technology-driven features

The LEKTRO® 88i tractor series has improved some of the features that our customers loved about the 8850 and added features that make it an asset for fighters, VIP transports, ISR aircraft, UAVs, and mid-size freighters.

LEKTRO® 89

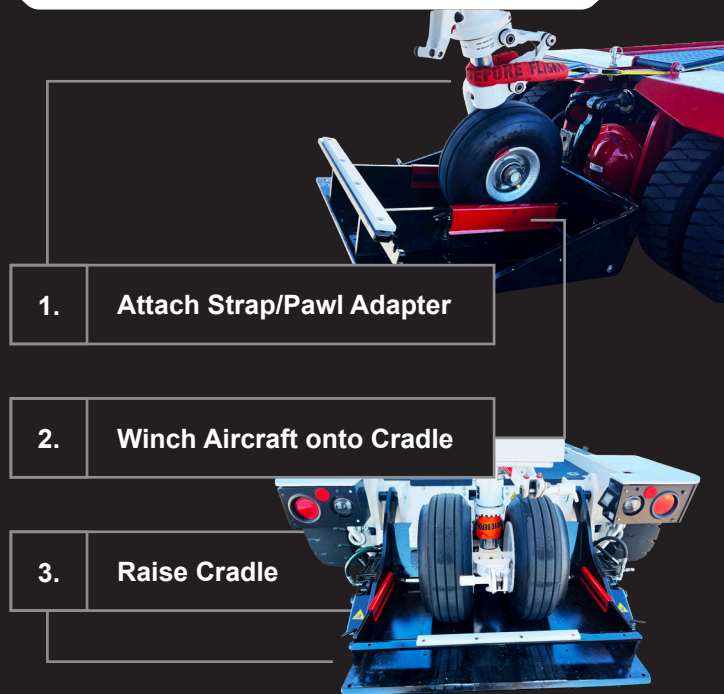

- Tows up to 280,000 lbs (127,006 kg)
- Suited for AWACS airframes and the smaller range of military cargo aircraft

The LEKTRO® 89 series represents the pinnacle of LEKTRO towing capacity and versatility. This line is a great choice for C-130s, VIP transports, and narrow-body (AWACS) aircraft.
