

ALL-ELECTRIC | HIGHLY RELIABLE | POWERFUL | PRECISE | AGILE

INNOVATION THAT MOVES THE AVIATION INDUSTRY FORWARD.

Oshkosh AeroTech LEKTRO® Towbarless Tractors provide an all-electric, powerful, and precise alternative to traditional towing. The all-weather design enables a single operator to move aircraft in challenging conditions, while the adept maneuvering and quiet, emissions-free technology make it a natural fit in the hangar. The range of LEKTRO® Tractors provides the ability to maximize space and streamline ground operations, helping to ensure aircraft is ready to move forward.

LEKTRO® 86

- Base model tows up to 30,000 lbs (13,608 kg)
- Extended “X” model tows up to 40,000 lbs (18,144 kg)
- Extended “X” model option adds 24” of clearance length
- Suited for medium-sized, corporate aircraft down through light sport

The LEKTRO® 86 Tractor series provides all the maneuverability of commercial tractors in a compact size intended to meet the needs of owners and smaller FBOs. The extended model is great for towing 5-bladed PC-12s and longer-nosed jets.

LEKTRO® 87

- Base model tows up to 80,000 lbs (36,287 kg)
- Extended “X” model tows up to 85,000 lbs (38,555 kg)
- Extended “X” model option adds 32” of clearance length
- A great choice for most aircraft up to large corporate jets

The LEKTRO® 87 Tractor series has the flexibility to easily tow a light sport aircraft up to a mid-sized regional jet without compromising its compact design. This model is a great choice for busy FBOs and airlines desiring sustainable technology coupled with an efficient, towbarless design.

LEKTRO® 89

- Tows up to 280,000 lbs (127,006 kg)
- Suited for narrow-body airliners, military cargo aircraft, and airline-sized corporate jets

Customers looking for robust power will appreciate the strength of the LEKTRO® 89 series. Continuing to leverage the agility provided by the LEKTRO® product line, this unit will provide the most power to move almost any narrow-body aircraft while also being nimble enough to continue supporting smaller aircraft.

LEKTRO® 88i

- Tows up to 120,000 lbs (54,431 kg)
- Supports most aircraft up to ultra long range jets
- Fully PLC-controlled, iOPS® Monitoring Technology capable, 80v AC drive system, and other technology-driven features

The LEKTRO® 88i Tractor leverages the strong legacy of the LEKTRO® 88 series and adds even more technology, making a powerful addition to the hangar.
