iOPS[®] Monitoring and Management Tool

Using our real-time asset monitoring and operational management tool, iOPS, we can help you manage your assets and personnel. With iOPS, you get actionable information, on your mobile or PC device, that provides you with equipment status, diagnostic tools, operations monitoring, video streaming from key areas, usage, fault histories, and much more.

Learn how we can help with your operations and maintenance needs.

Airport Services for Gate and Terminal Maintenance

Let the experts at Airport Services help you with:

Turnkey BHS Projects: From design, project management, installation, to commissioning and turnover, we are ready to manage your BHS project.

BHS: Baggage Handling System — AeroTech operates maintains, designs, upgrades, refurbishes and manages BHS systems and projects.

EAM: Enterprise Asset Management — The Airport Services specialists have years of experience helping manage vital airport assets. AeroTech can help with repair / replace decisions, spare parts management, full-service on-site maintenance, 24/7 monitoring, preventive maintenance programs, and equipment operations.

CMMS: Computer Monitoring Management Systems — AeroTech iOPS® provides real-time, actionable information on your gate and terminal equipment to your office and mobile devices.

MEPS: Mechanical, Electrical, Plumbing, and Structural — AeroTech monitors, maintains, and operates most of the systems inside terminal facilities as well as managing construction projects.

HVAC: Heating, Ventilation, and Air Conditioning — AeroTech maintains and operates central air systems, chillers, air handlers, ducting, and point-of-use preconditioned air units.
