Air-portable Cargo Handling Dock (ACHD)

The Air-portable Cargo Handling Dock (ACHD) from JBT AeroTech Defense, is a robust, lightweight (1100lb, 499kg per table) air portable (Hi-Line) cargo handling dock for pallet building and storage at main and forward operating bases. Each dock system is built up from standard (96"x 96", 2.44m X 2.44m) tables. Multiple tables can be joined together forming a dock suitable for purpose. Each table is capable of supporting 13500 lbs or 6136 kgs. A typical configuration of 5 tables is designed to carry five standard 463L military pallets.

Features:

- Each ACHD is comprised of multiple tables. The number of tables needed depends on the application.
- Lightweight tubular aluminum construction
- Fast deployment and setup. Two personnel, 15 minutes per table
- No special tools required for setup.
- Easily transported. Five tables dismantle to fit on a single 463L military pallet.
- Large capacity. Each table supports up to 13500 lbs or 6136 kgs.
- Tables consist of six rows of full-length, low friction roller conveyors for ease of pallet movement.
- Optional extended guiderails / handrails
- Large contact pads to prevent sinking into soft ground. Pads mounted on ball joints for flexibility.
- Independent, adjustable-height legs (37.5" – 43.5", 0.95m – 1.11m) for leveling and ease of docking.
- Tables can be added to adjust overall length of the ACHD dock.

Dimensions / Weights:

- Individual tables (96" X 96", 2.44m X 2.44m). Tables can be joined together for needed dock length.
- Minimum height 37.5" / 0.95m
- Maximum height 43.5" / 1.11m
- Each Table weighs 1100 lbs / 499kg. Five Tables break down to fit on a 463L military pallet.
- Each Table supports up to 13500 lbs / 6136 kgs.
