

JetAire® M60 Mobile Pre-conditioned Air Units

An Oshkosh Corporation Company

JETWAY SYSTEMS®
For the Perfect Turn

An Oshkosh Corporation Company

AeroTech's JetAire M60 is mobile, diesel-powered conditioned air for your regional and narrow-body aircraft. A compact, reliable, high-performance design, the JetAire M60 saves money, improves passenger comfort, is easy to operate, and is designed for flexible operations in

JetAire® M60 Mobile Pre-conditioned Air Units

Save money

- Save money and fuel by reducing the need for the APU during the aircraft turn
- Energy-efficient design helps maximize the PCA investment

Enhance passenger comfort

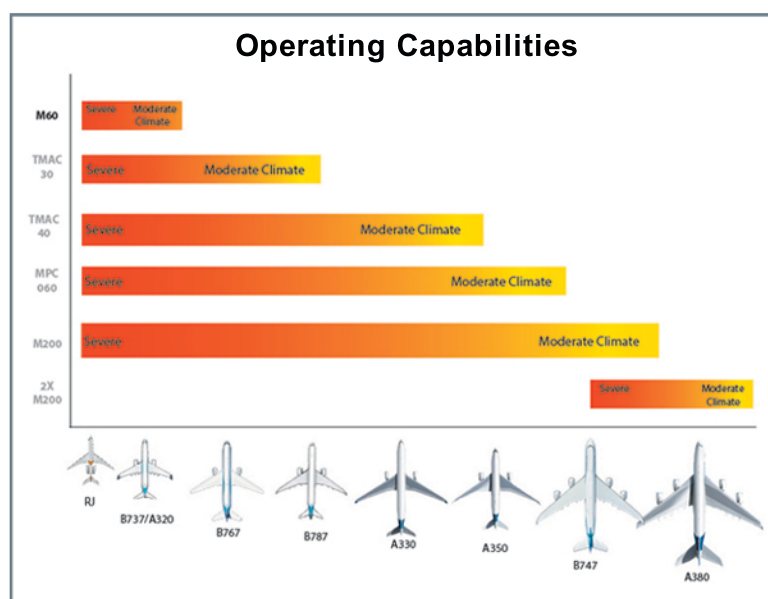

- Better defrost management means comfortable passengers; keep the cold air coming longer
- Steady discharge air temperature over a wide range of operating conditions

Easy to operate and maintain

- Intuitive, operator-assist HMI controls guide the user through operations
- Convenient layout facilitates connection to the aircraft
- Tier IV diesel engine options requiring no DEF.
- Tier III and Stage V engine options
- Easy access to critical components and systems

Flexibility

- Minimize the impact of defrost cycles with dual, independent refrigeration circuits
- Pressure-controlled airflow safely serves a range of aircraft cooling requirements
- Highly maneuverable cart design with efficient hose storage
